

## **Cigna Bill for Denial Process**

### **Purpose of this communication:**

- To provide direction to DME & Home Infusion providers on the new process for submitting Cigna Bill for Denial claims to CareCentrix. A Bill for Denial claim is a claim that is not covered by the primary payor but may be covered by a secondary funding source. The provider is seeking to obtain a benefit denial from the primary payor in order to file the claim with the secondary funding source.

### **What do I need to know?**

- Effective July 1, 2018, add a GA modifier to the HCPC/Modifier when billing a Cigna Bill for Denial claim to CareCentrix.
- Add the GA as the last modifier on every claim line submitted as Bill for Denial.
- All claim lines on a Bill for Denial claim must contain the GA modifier. If billed with other claims lines not containing a GA modifier, the claim will be rejected.
- Include one of the following notes in the Claims Header Level NTE segment indicating the reason the primary payer will deny:
  - Deny for Medical Necessity
  - Deny for Benefit Maximum
  - Deny for Non Covered Benefit
- The new process applies to all Cigna Bill for Denial claims submitted to CareCentrix on or after July 1, 2018 regardless of the date of service.

### **What else do I need to know?**

- This new process initially only applies to DME & Home Infusion providers and only for **Cigna** Bill for Denial claims. We will notify you as other plans are migrated to this new process in the near future.
- For additional information, please visit our Provider Portal at:
